

ULTRAMAX® 1400-CVS Crushing & Screening System

One of our most versatile systems utilizing a portable impactor plant and screening plant separately or combined to produce numerous spec products.

Features

- ① Includes the 1400-45 CV with a front-discharge conveyor, 6x20 screening plant with an integrated feed conveyor, return conveyor with a cleated belt and three, radial-stacking conveyors.
- ② Hydraulic lift and leveling system enables quick set up and tear down by using the hydraulic run-on legs and the available run-on hydraulic legs for the screening plant.
- ③ The removable electric control panel on the 1400-45 CV plant is designed for the integrated system including pre-wired receptacles for the radial stackers.
- ④ Available in-line electro-magnet on the front-discharge conveyor.
- ⑤ Totally self-contained, reliable diesel/electric or all-electric power. You won't have to worry about hydraulic leaks and failures shutting you down.
- ⑥ Includes 6x20 screening plant with integrated feed screen conveyor.
- ⑦ Using the conveyor, ability to return oversized product from the screening plant to the crusher hopper for further reduction or to stockpile.
- ⑧ Features the industry's only LIFETIME ROTOR WARRANTY on its solid-steel, three-bar, sculptured rotor—the industry's heaviest—to keep you up and crushing.*

*North America only.

Additional Features

- Replaces large complex crusher and screening systems for a much lower initial investment and for greatly reduced maintenance, fuel and transportation costs.
- Produces three cubicle spec products simultaneously and returns the oversized product from the screening plant to the UltraMax® impactor plant for further reduction or to stockpile.
- Designed for maximum portability with ease of operation and ease of service.
- Features standard grizzly bypass chute and available cross-belt conveyor with flop gate to allow for either removal of the material that passes through the grizzly deck for stockpiling or blending back with the crushed material.
- Manage the feeder speed for complete control of the flow of material into the impactor with Variable Frequency Drive (VFD).
- Includes wireless remote control for the feeder shutdown and all motor stop.
